GLENDALE, LOS ANGELES

Vol. 1

Come and See Glendale, "The Jewel City" of the San Fernando Valley—The Most Beautiful Suburban Route Out of Los Angeles—Only a Twenty Minutes' Ride.

If you are bent on a short sight-seeing trip out of Los Angeles, don't fail to come to Glendale, "The Jewel City of San Fernando Valley." The tour each way will consume but twenty minutes of your time, and lightened your purse by an outlay of only 25 cents for the round trip.

Glendale is but seven miles from the Pacific Electric depot in Los Angeles, one of the most massive and magnificent electric car stations in America.

The car or frequently daily the train of three cars that start from this depot on the race to Glendale, while travers-

geles, thence you glide by Echo Park lake, a beautiful body of water, a half mile long, which is bordered by giant shade trees and by shrubbery, vine, plant and flowers.

Full tilt then you go on to Edendale, a delightsome suburban village. Here you pass a mighty hippodrome where real cowboys ride flying steeds and perform incredible feats, which the camera catches, and moving pictures reproduce all over the world.

A short ride thence northward and San Fernando Valley, in all the majesty of its panoramic glories, bursts upon the vision—mountain, hill, dale and valley, contributing to the charm

growth, which has 5,000 refined cultured citizens, which has 25 miles paved streets with cement curbs sidewalks, with two electric and steam railway, with two grammar schools and a \$75,000 High School, with seven churches, a municipal packing plant, two planing mills, four packing houses, over fifty business places, with the Glendale Sanitarium, one of the largest and best in America, with the largest chicken yard in West, a city which in a single month has shipped over 75 carloads of citrus fruits over the Salt Lake railroads, a city which has the purest water abundance, and the most even, all

The Jewel City is the cleanest and healthiest suburb on the Coast. Its altitude is correct. Its distance from the coast is correct. It is in correct position to get the foot movement of the years to come. Property prices are lower than in other suburbs. Property values are steadily advancing, not at all but by steady growth.

Practically all the officers, directors and depositors are Glendale men. The bank loans all of its funds only to Glendale men excepting, of course, its reserves. It makes no foreign loans whatever, a temptation but few banks are able to withstand, since the interest from this latter source is many times greater and the loans are a time much shorter.

WATCH FOR OUR NEXT NUMBER:

The next issue of The Press will be replete with interviews with several of our leading citizens, and with articles dealing in detail on some of our chief resources.

The election for school trustees is April 7. Be sure to vote.

The only polling place is the Fourth street grammar school.

The polls will be open next Friday from 8 o'clock in the morning until sunset.

It is to be regretted by readers of the man known as is Wilmot Parcher has permitted his name to go before the voters for the position of school trustee at next Friday's election. Mr. Parcher has always been an enthusiastic supporter of the movement that means progress for our city, and has worked hard and earnestly for the upbuilding of Glendale since its incorporation. As President of the first Board of Trustees Mr. Parcher devoted much time and energy to see that the infant city's affairs were well managed, and the citizens who helped guide our destinies in the earlier days know how well he succeeded.

Ordinarily the position of school trustee goes begging by reason of the fact that men of large affairs have not the time to devote to a position with no salary attached, but the campaign this year seems to be an exception which proves the rule.

The advancement in school movements would never have been accepted in the world today without public opinion having been aroused to the benefit to be received by the youth in such advancement.

When thinking people, with honesty of purpose, agree on public problems, action for good to the communities where they reside, is sure to follow.

Education along special lines of sanitation, hygiene, pure food, clean towns, pure air and clean morals, has destroyed many broken idols of ignorance and eliminated politics and graft from the government of many cities and towns. Progressive parents, who are looking for the best advantages for their children in every avenue, do not care to cling to the old order of things just to favor some one who has tenaciously clung to various town offices for years, for their selfish purposes, or for a desire for local honors.

This is an age when people are demanding the best talents, the most unprejudiced minds, those who will work to prevent "scomfort and carelessness," and not to best who will wildly endeavor to crush out calamities of any order, after they have fallen on a community. The old adage, "an ounce of prevention is worth a pound of cure," is being appreciated by placing specialists in office where the people will be the most benefited. There are, among certain classes, those who never favor changes from old ways to the new and better ones, there is always a battle royal between knowledge and ignorance, "between laymen and trained sanitarians." Every thinker knows that all sanitary problems must be solved by expert specialists and not by those who know no special need for improvement along sanitary lines.

If schools are to reach to the top of the ladder of benefit, which taxpayers have a right to demand, there must be more efficiency, more time and thought put upon the duties and responsibilities of the board of directors, and it must come from those who are the most deeply interested and have the highest ideals of citizenship. Be grateful for the workers in the past, but whenever there is an opportunity to better public conditions embrace every improvement and up-to-date idea of those who manifest intelligent comprehension of new methods and satisfactory results, no matter what personality is going to be passed in the race for the goal. The highest efficiency in all matters and projects for the public good can only be attained by co-operation among the more intelligent classes. It matters not whether a man, or a woman is rich or poor, popular or unpopular, if that person is especially fitted by nature and education for a certain office they should be urged to fill that position in order to render efficient service to the greatest number.

Public spirit must work for public benefit, no matter what twig is cut from the tree of private prejudice. Dr. Jessie A. Russell is fitted by her natural gifts and years of study, to fill with "acknowledged ability," the office of "school director" in our city. It would be fortunate for the children if her knowledge of their needs, as an educated, progressive thinker and able physician, could be placed in a position where she could benefit them by her suggestions and advice. We cannot rid ourselves of responsibility as voters, if we do not elect Dr. Russell to fill a position where she is so greatly needed in the advancement of every good cause, which will benefit the children and the town of Glendale. Let politics and local prejudices be set aside and let this capable, trained woman be placed where she will prove her "administration" to be a lasting benefit to the children, the parents and the municipality in which she is an honored citizen.

Miss Wagner is on her way to spend the summer with friends in Madera, and will remain in Glendale a few days only, having made the acquaintance of the Mackey family during a former sojourn in California, when that family resided in the northern part of the state. Miss Wagner will start for Madera the latter part of the week after taking in some of the many delightful trolley trips the Los Angeles railroad companies have arranged to amuse and convince the easterners of the beauties of the Golden West.

THE YARD MEASURE

Although innumerable yards of satin and cloth are being bought and sold every day in this country, it is probable that very few persons, whether purchasers or salesmen, could say off-hand how we got our

measure. It represents the armament of King Henry I, which was 26 inches, and it was he who ordered that the length of his own should be the standard measure—an ordinance that has been preserved in commerce to this day. Obnoxious Londoners and others may aware that the imperial standard rods are recorded in stone on the side of Trafalgar Square, where they were engraved in 1876—West Gazette.

WOMEN OF SOUTH AFRICA

The South African woman is generally highly domesticated; she is only capable of managing her household servants very cleverly, but she is to cook well, make jam and pickles, look after poultry, attend to the garden and make her own dresses and those of her children.

The social life in all South African cities is a strong feature, dancing is favorite amusement and holiday picnics on river banks are general. Women play tennis, croquet and golf and a good deal of cycling. Life in South Africa ranges from old established culture and luxury, with every bounding convenience and taste, to the loneliness of the veldt farm, and this life and her husband's interests, an English born girl soon adapts herself if she is at all adaptable. She is healthy, happy and free and fairly prosperous, with more money to spend than she would have in a similar position at home.—English Magazine.

CLUB NOTES

By Mrs. Mary H. Gridley.

It rejoices the heart to read the fine list of books in our town library and to know that we have a librarian who will do all in her power to promote the reading of the best books gathered there. Years ago, librarians used to regard it as their principal business to protect the books, keep them in order and perfectly clean, and discourage a general use of them, for fear they would be soiled; we know that favorite books are soon worn out, but they are in the library to be used, and we are thankful we have a librarian who is so ably discharging her function in every way encouraging the reading of books which are elevating and instructive. The founders of the Tuesday Afternoon Club did a great work in starting the library here and in working untiringly for its success. It is a great success, and has been such momentum that it almost goes of itself with the aid of the taxpayers and the wise "city fathers." Everyone will be glad when we have a new library, but the rooms now are very comfortable and pleasant. Among some of the bright things which Elbert Hubbard has said recently is the following: "Woman's work is any thing which she can do," and women are certainly among the best librarians in the world; we are grateful to Fra Elbertus for placing a definite boundary around the sphere to which women should confine themselves, and it will certainly be the inhabited terraqueous globe. We are thankful that it was through women's clubs that the Appalachian Forests and Palisades have been saved to this country, and that when the United States Conservation Commission reported in December, 1908, and shocked the whole country regarding the forestry waste, the forestry committees in women's clubs had been working for conservation of our forests for seven years! The effects of soil erosion and deforestation had been earnestly discussed in many eastern clubs and was a familiar topic in the general Federation of Women's Clubs.

Now, through "Child Labor" and industrial committees, the women, in many of the clubs, are working for the conservation of life among those without influence and with little money. All of the natural resources of our country have been included in the conservation departments of the state federations and district federations in most of our states. Completing the Roosevelt dam in Arizona is an event in conservation that our country may be proud of, because it means reclaiming over 200,000 acres and "making room" for more than 100,000 people in that section of the United States. Every one knows that the dam is on Salt River, a big stream in Arizona seventy-five miles east of Phoenix. This dam blocks a narrow gorge in the mountains (just as in our old Greek histories, which told how Lycurgus and his 300 men held the pass at Thermopolea). This dam controls enough water to make a lake thirty miles in length; the dam is over 1,000 feet long at the top and 280 feet high. This water will be used to develop electric power and will be admitted to the valley for industrial use. The climate is fine and there is almost as sunny as California.

Tropic Thursday Afternoon Club

Will have Mrs. Willoughby Rodman to speak on "Playgrounds" Thursday of this week. The subject of her talk brings from the storehouse of my subconscious mind the face and form of Luther Halsey Gulick, president of the Playground Association of America.

This man, who has long been identified with the great movement to build up a higher type of manhood and womanhood, has been one of our friends since girlhood, and as physical director in the New York City public schools he has been a wonderful help to the youth. Dr. Gulick gave a report in one of his addresses on the subject of "Playgrounds," that may be of interest to the readers of our club notes. He says: "Four years ago there were ninety cities in America that started playgrounds on public taxation.

People in charge of the playgrounds are paid, just as the teachers in the public schools are paid, by public taxation. Three years ago 137 cities had publicly supported playgrounds. One year ago there were 336 cities who were in the category." And still the work goes on. H. T. Musselman, one of our New York City editors, says:

"Activity in play is the birthright of childhood. Every muscle is quivering with a desire for motion; it is Nature's call for development. Play creates instruments for the use of the brain and nerves and mind in their direction of the activities of the world's work."

Jane Addams says: "The spirit of youth is the most precious possession of the race."

Stanley Hall says: "Play, at its best, is only a school of ethics; it not only gives strength, but courage and confidence; tends to simplify life and habits; gives energy, decision and promptness, brings consolation and peace of mind in evil days; is a resource in trouble, and brings out individuality."

Properly directed play will help to turn to valuable developments the boy's muscular and mental life, establishing correct habits. It is a question which is being discussed among all who are interested in the youth of our land, and what sane person is not? It will develop a broader sympathy with the playful spirit in our boys—God bless them—and cause the people who are grown-ups to give them suitable places in which to play.

Mrs. Russell Sage, of New York, who never had any children of her own, is giving liberally of her money for playgrounds for the children of other people.

The Tuesday Afternoon Club

Had a great treat last Tuesday with the entertainment which was given by the Civics Department. Dr. Jessie A. Russell, chairman, Miss Bertha C. Moore proved an able and interesting speaker. She manifested a wide knowledge of her subject and it was a great pleasure to listen to her instructive talk. The District Federation of Clubs have a valuable chairman of civics in Miss Moore. The clubs have expressed to the president, Mrs. Baurhite, their appreciation of

her efforts to awaken the clubs more fully on all the civic questions of import.

The music was a fragrant bouquet of sweet spring songs, sung by Mrs. Thomas Catherwood of Los Angeles, in several languages, disclosing both her God-given gift and exquisitely fine musical training. Her gracious compliance with the invitation to favor us and bring her accompanist will long be remembered by the entire club.

"The musical trio," accompanied by Mrs. Gibson, was a delight to every one present. They do excellent work and are always a credit to themselves and the town. We thank them and appreciate their generosity and the spirit of unselfishness, which gives us much pleasure to others.

The beautiful and eloquent tribute given by Mrs. Austin N. Palmer of New York City to her "tried and true friend," the president of the club, was applauded by the audience, and the sympathetic tears which coursed down the cheeks of her listeners proved that the tender fountain of love, in Mrs. Palmer's heart, gained expression through a mental reservoir of unusual depth and culture. The president felt she had climbed to the top of one of the high buildings in dear old New York, and was taking a memory glimpse of the loving, faithful friends with whom she has been associated for many years. She heard again their voices, flashing approval of her efforts in the busy clubs. It came like flowing streams of silver in the sunlight of tender memories. There was back of it all the deep blue sea, our own Atlantic ocean, the shadowy forms of the Palisades in the blue mist of the Hudson River, and a big wave of homesickness seemed, for a moment, to swallow her up; then came the sound of applause from her own California club, the beloved land of her adoption, the land where she expects to spend the remainder of her years, and where she has tried in every way to do, moment by moment, the duty which has come to her hand. It matters not how imperfect has been her judgment, or how unskillful the serving, her heart has always been filled with the most earnest desire to benefit, even in the smallest and most obscure way, all with whom she came in contact, ever desiring to employ every shred of a gift which God has bestowed upon her in helping her fellow men and in wayside ministries, but they ever so small. "I expect to pass through this world but once. If, therefore, there be any kindness I can do to any fellow being, let me do it now. Let me not defer, nor neglect it, for I shall not pass this way again."

The Ebell Club of Los Angeles Spake in the highest terms of Mrs. Grace Widney-Mabee as a musical success. She will entertain the Glendale Tuesday Afternoon Club on April 11 at Fligel's opera hall, beginning the concert at 2:30 o'clock. Mrs. Gertrude Ross, who is so well and favorably known, will accompany Mrs. Mabee on the piano. It is a great opportunity to hear a fine concert for the sum of 25 cents for each guest of the members, or for any gentleman or lady who desires to be present for this program. The Ebell Club says: "Mrs. Mabee's voice is a dramatic soprano of wide range and flexibility, sweet and pure of tone. Another charm is her clear enunciation. She delighted her audience and sings for us again this month." Gertrude Ross has played several times at concerts for the Ebell Club and Friday Morning Club. They are always enthusiastic regarding her artistic work.

The Reciprocity Club Will hold one of their interesting meetings at Christopher's banquet hall on Tuesday, April 4. The meetings are always interesting and instructive. One of our Glendale ladies, Mrs. Garrett, is to be the speaker this week. We bespeak a large audience for her.

CHRISTIAN CHURCH NOTES Church services were well attended Sunday, four persons being received into the fellowship.

Regular meeting of the official board Monday night of this week.

The Ladies' Aid Society will have a social tea at the church Wednesday afternoon. All ladies invited. An interesting program has been prepared.

Prayer meeting will be held at the home of Mr. and Mrs. Kilburn, 1128 Tenth street, Wednesday evening. The meetings have been invited to the homes of the members for a time.

The choir is working hard on Easter music. The main practice will be held this week at the church, Thursday evening. If you are a member or a friend of our church and can or will sing we ask your co-operation and attendance at these rehearsals.

The Christian Men's League will have a banquet at the church Friday evening, April 7, following which they will meet weekly.

The Royal Workers Sunday school class had their monthly social at the church last Friday evening.

A Junior Christian Endeavor was organized at the church Sunday afternoon.

All invited to our services Sunday. Both Sunday school and church in the morning. Junior and Senior Endeavor and church services in the evening.

THE CIVIC COMMITTEE OF THE TUESDAY AFTERNOON CLUB

Have announced the fact that cuttings from geraniums and other plants, with Madeira bulbs, etc., etc., will be given away to those who desire them on "Clean-Up Day," April 15th, at a place where the committee will designate later on. To all those who have promised "cuttings" from plants, and to any other persons who have them to spare for the beautification of our city, where they may be needed, we request that they will send them on the 13th or 14th of April to any one of the following committee: Dr. Jessie A. Russell, Mrs. E. D. Goode, Mrs. R. L. Hinckley, Miss Ruth Byram, Mrs. E. W. Pack.

SUNDAY AT POSTOFFICE.

The general delivery windows at the main post office in Los Angeles and substations will be kept open one hour on Sunday forenoon, according to present indications. No mail will be delivered to callers through the carriers' windows, and no mail deliveries will be made on Sunday. This is according to the recent order of the postmaster general, following the filing of thousands of petitions.

TRUSTEES' MEETING

All members of the Board present. The committees' reports were very quickly despatched with. The City Clerk's report for March was received and placed on file. The City Treasurer's March report was received and after some discussion was referred to the finance committee. The Health Officer's report recommended that all the reservoirs be covered and that all of them be cleaned at least once a year at a certain time, and was referred to the City Attorney for a written report as to the enforcement of the above recommendations. The report of the City Marshal was referred to the police committee. The city light department report, which was accepted and placed on file. Building inspectors' report showed 20 building permits were issued for a total valuation of \$10,065.00. The Recorder's report was received, accepted and placed on file. The night watchman's report was referred to police committee. The city marshal's report showed for the month of March one fire, at the corner of Ninth street and Central avenue, of \$90 damage, two arrests and one burglary committed. The board ordered the street superintendent to change the fire plug located at First street and Isabelle street to the parkway at the same place. The city marshal requested of the board some cards having the fire and police telephone calls on them. Referred to police and sanitary committee, with power to act. Other minor recommendations from the same source were acted upon favorably to the city marshal. He recommended that a fire hydrant be placed at First and Jackson streets, which was referred to the city marshal to make it a written report for next week.

A communication to the effect that April 15 be set aside by the city as a clean-up day and signed by the civics improvement committee of the Tuesday Afternoon Club was received by the Board. Motion passed by the Board that the citizens and residents co-operate in effecting a "City Beautiful" on April 15th and that it be a general clean-up day. The ordinance for the selling of bonds was read for its first and second time. Mr. Frazer reported to the Board that he would start work collecting rubbish Wednesday. The question of amending the city fire ordinance was discussed. The Board voted to put a fire hydrant on Third street, between Isabelle and Jackson streets. The matter of the new city hall was discussed at length. The Carnegie Library question was taken up by the Board.

Board adjourned at 10 p.m.

J. H. FLOWER TO BUILD

Mr. J. H. Flower will build an exceptionally attractive bungalow on the northwest corner of Fifth and Central avenue, Glendale, the plans of which will be drawn by Roy F. Bancroft, 1106 West Fourth street, Glendale.

The bungalow will consist of five good-sized rooms, modern in every respect, with interior finish of considerable better grade than at a rule has heretofore been installed in the bungalows of Glendale that are of this price. The interior treatment of the different furnishings such as the fireplace, buffet, beams, etc., will be very unusual in design. The job will be started in the next week or ten days, and the approximate cost will be about \$2,600.

E. W. CARROLL ARRESTED

E. W. Carroll, who has been wanted in Glendale for about three months, was arrested by the city marshal of Glendale and a deputy constable of Los Angeles last Friday at a lodging

The Epworth League of West Glendale held their first social, on Friday night last at the church. The house was full, a splendid program occupied the greater part of the evening, and punch and wafers concluded the happy event. Great credit is due the young people in perfecting so complete and successful an evening of pleasant entertainment and enjoyment, especially pleasing being the band (?) which one by one disappeared until the leader suddenly found himself alone; also the work of the little ones who furnished a goodly part of the program, and last, but by no means least, members of the league, who took an active part in the program, did each one his and her part perfectly and well.
